OBJECTIVE

Motivated Frontend and Full Stack Developer skilled in modern JavaScript, React.js, Next.js, and Tailwind CSS. Hands-on experience developing high-performance, responsive web interfaces connected with live APIs and backend services. Eager to join an innovative organization as an intern to collaborate on real-world web products and expand my software development capabilities.

SKILLS

Programming Languages: JavaScript (ES6+), Python, SQL, C++, HTML5, CSS3

EDUCATION

BCA — ITM College of Science and management

2024-2027

EXPERIENCE

FullStack, Obtains

2026-08 – Present

React.js, Next.js, Node.js, FastAPI, Tailwind CSS, Express.js

- Passionate and results-driven Full Stack Developer with hands-on experience in building scalable, real-world web applications using React.js, Next.js, Node.js, and Python (FastAPI). Proficient in RESTful API development, PostgreSQL/Supabase database management, and cloud deployments. Proven ability to design responsive user interfaces and integrate secure backend architectures. Seeking a challenging software engineering / web development internship where I can contribute to impactful projects and learn from an experienced engineering team.

PROJECTS

Kisan Market

<https://kisansmarketindia.in/>

Next.js, React.js, Python (FastAPI), PostgreSQL, Supabase, Tailwind CSS, Razorpay

- Architected and developed a full-stack digital agriculture marketplace connecting farmers directly with bulk buyers at 0% commission. Built a modern, responsive user interface using Next.js, React, and Tailwind CSS featuring role-based dashboards for farmers, buyers, and drivers. Engineered high-performance backend APIs using Python (FastAPI) and Supabase (PostgreSQL) for crop listings, inventory, and order management. Implemented Indian language Text-to-Speech voice assistance (Sarvam AI) and OTP-based mobile carrier authentication. Integrated digital payment workflows with Razorpay, automated e-Way billing, and live logistics freight tracking.

ACHIEVEMENTS

- **Project Lead & Innovator — Lenovo LEAP Hackathon 2026** — Proposed and architected an AI-powered rural supply chain and crop logistics platform. Designed complete technical proposal, database schema, and live tracking workflows. Demonstrated production-grade deployment with automated billing and order management.

HOBBIES

Problem Solving & Exploring New Tech
